

PARAMEDIC DICTATION POCKET CARD

Talk through these 12 in any order. Fragments are fine. Skip what's in structured fields.

1. CALL FRAME

- Unit / dispatch complaint / response mode
- Scene type / other agencies + their role
- Delays and why

2. ARRIVAL PICTURE

- Where found, position, first impression
- Who was present
- Scene observations that shaped decisions

3. PATIENT

- Age / sex / est. weight
- Baseline status if known

4. STORY

- Chief complaint in their words
- Onset / duration / mechanism
- Better-worse / before your arrival
- Who gave history + reliability

5. PERTINENT NEGATIVES

- What the patient specifically DENIED

6. EXAM HIGHLIGHTS

- Only findings that drove decisions
- or are not in structured fields

7. NUMBERS

- Vitals not on upload / trends
- Anything abnormal + your read on why

8. THINKING

- Working diagnosis
- What else you considered + why less likely
- Protocol used (name or number)

9. DOING

- Each treatment + why
- Anything withheld + why
- Patient response

10. MOVING

- Transport decision + destination rationale
- How moved / position + why
- Condition on arrival

11. HANDOFF

- Report given to whom
- Records, lines, devices, belongings

12. EXCEPTIONS

- Anything unusual / refused interventions
- Delays / equipment issues
- What a reviewer should understand

PHOTO: monitor, med vials, facility paperwork, glove notes.

HIPAA: crop/cover names, DOBs, MRNs, faces BEFORE the photo.

Can't fully redact it? Don't shoot it -- dictate instead.

HOURS LATER? Say so -- you'll get targeted recall questions.

Can't recall it? Say so. Gaps are marked [VERIFY], never filled in.

You review and own every word before submission.
